

## **SEMI Fall Standards Meeting 2019**

### **MFC TF Meeting Summary**

Date: Nov 04, 2019, 11am-12noon

TF Co-Chair: M. Saleem

#### Summary:

- Document 6512 (SEMI E12 Reapproval) failed Cycle 5-2019 ballot. The reject was reviewed at Semicon West 2019 and found persuasive. It was based on Scope section not clearly specifying media- gas or liquid.
  - The TF leader proposed adding a section to Scope to clearly state the standard is applicable to gases and vapors. TF members approved the change and the document would be sent out for re-ballot.
- TF discussed porting EtherCAT dimensional specifications from ETG (EtherCAT Taskforce Group) to SEMI at the recently concluded ETG meeting.
  - The MFC TF will create a SNARF and circulate for GCS review for 2 weeks.
  - Kelly M from Pivotal will help write the standard.
  - Any standardization on Power Connector Pin Outs will be discussed separately and will form a separate standard.
- Next meeting: Spring Standards 2020 meeting, March 30, 11am-12noon.
