1. Rationale:

a: Describe the need or problem addressed by this activity.

(Indicate the customer, what benefits they will receive, and if possible, quantify the impact on the return on investment [ROI] if the Standards Document is implemented.)

To be revised due to 5 years review. There are some obsolete and nonessential references to be removed.

b: Estimate effect on industry. Check one of the following:

☐ 1: Major effect on entire industry or on multiple important industry sectors

- identify the relevant sectors: _____

☒ 2: Major effect on an industry sector

- identify the relevant sector: Industry of FPD and related materials

☐ 3: Major effect on a few companies

- identify the relevant companies: _____

☐ 4: Slight effect or effect not determinable

c: Estimate technical difficulty of the activity. Check one of the following:

☒ I: No Difficulty – Proven concepts and techniques exist or quick agreement is anticipated

☐ II: Some Difficulty – Disagreements on known requirements exist, but developing consensus is possible

☐ III: Difficult – Limited expertise and resources exist and/or achieving consensus is difficult

☐ IV: Extremely Difficult – Expertise and resources are scarce and/or achieving consensus is very difficult

2. Scope:

a: Describe the technical areas to be covered or addressed by this Standards Document development activity.

(For Subordinate Standards, list common concepts or criteria that the Subordinate Standard inherits from the Primary Standard, as well as differences from the Primary Standard.)

This Document provides terms and definitions of materials and defects within and on the surface of flat panel display (FPD) substrates and of dimensional, thermal, chemical, optical, and mechanical properties of FPD substrates.

The scope of this revision is to remove obsolete and unnecessary references for the reader's convenience.

b: Expected result of activity
