RE: Request for a SunEdison Inc. Wafer code per AUX001.

Dear Mr. Nguyen and SEMI colleagues:

This letter is to formally request a 2-digit company code for SunEdison, Inc. As you may be aware, SunEdison Inc, formerly known as MEMC, has spun off its semiconductor business. That group is called SunEdison Semiconductor. SunEdison, Inc. is a distinctly unique organization, one that specializes in renewable energy technologies, primarily solar.

In perusing your list of existing codes, I noted that a number of 2-digit alpha codes have been taken by other organizations. Would it be possible to select and reserve the code, "PV"? It appears to be available and indicates our singular focus in this market.

Kindly confirm that this code will represent SunEdison, Inc. and we will begin using it immediately.

If you have any further questions or require clarifications, please do not hesitate to contact me.

Sincerely,

A handwritten signature in black ink, appearing to read "Ethan A. Good".

Ethan A. Good, Ph.D.  
Director, Research & Development  
Solar Materials
